

Here's your Free Guide.....
This is **DAY 1** of the *AI Creator Series*

The Arcane x Spider-Verse Style — Stylized Animation That Looks Like A Movie

1 STEP 1 : Build Assets In Midjourney

- Character + location — the two assets that power every shot.
- Midjourney is trained deepest on stylized illustration and concept art — it understands painterly brushwork, graphic linework, and comic-book color theory natively.
- I recommend using V8.1 and 7 with raw raw mode.

★ THE STYLE SNIPPET — THE KEY TO EVERYTHING:

1. This is the exact snippet that unlocks the Arcane x spiderverse look.
2. Write your subject in plain language(whatever you wanna make - helicopter, car, etc use this snippet after describing your subject), then paste this at the end of EVERY prompt — character and location alike.

✓ COPY THIS SNIPPET — PASTE AT THE END OF EVERY PROMPT (FOR CHARACTER) :

in 3 panel character sheet against grey studio background, 1 front facing close up and and two full body of front and back, 3D cel-shaded painterly animation in the style of Spider-Verse and Arcane, bold hand-painted brushstrokes, confident graphic line accents.

✓ **COPY THIS SNIPPET — PASTE AT THE END OF EVERY PROMPT (FOR LOCATION):**

3D cel-shaded painterly animation in the style of Spider-Verse and Arcane, bold hand-painted brushstrokes, confident graphic line accents.

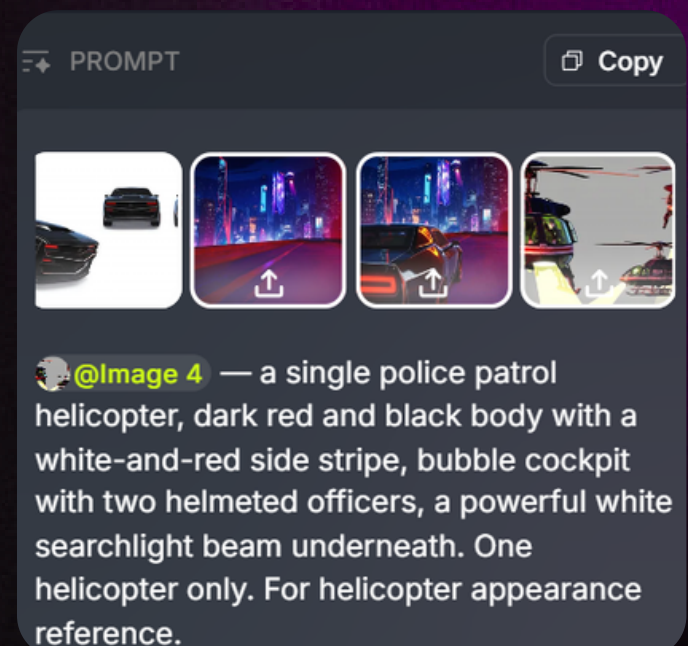

2 STEP 2 : Let Claude Write Your Motion Prompt

- Upload your location and character sheet to Claude AI and give it a rough idea of what you want in your video or whatever your idea is and ask it to give Seedance 2.0 prompts for your video.
- You can also take a reference from the prompts I have provided below.

3 STEP 3 : Generate In Seedance 2.0

- Open any platform with Seedance 2.0
- Upload your assets
- Paste Claude's prompt
- And generate 2-3 variations for best outcomes. We did 3-4 generations per prompt. You can variate the prompt and give iterations too.

SEEDANCE 2.0 VIDEO PROMPTS

That I used:

PROMPT 1:

<<<image_4>>> — a single police patrol helicopter, dark red and black body with a white-and-red side stripe, bubble cockpit with two helmeted officers, a powerful white searchlight beam underneath. One helicopter only. For helicopter appearance reference.

<<<image_1>>> — sleek blacked-out modern muscle car, glossy mirror-black, sharp faceted body panels, thin red LED light bars front and rear, dark multi-spoke wheels with red calipers. Vehicle reference.

<<<image_2>>> — neon-noir cyberpunk skyline at night, towering skyscrapers with cyan, magenta and red signage, a glowing red emblem, a wide bridge spanning toward the city. Environment, location and lighting reference.

<<<image_3>>> is only for reference of car's placement on the bridge. Frame from the previous video output.

SPATIAL: the black muscle car is parked on left side of the wide bridge in the neon city at night, facing forward. The patrolling chopper approaches from behind and above, descending toward it. One single helicopter throughout.

3D cel-shaded painterly animation, Spider-Verse meets Arcane — bold hand-painted brushstrokes, confident graphic linework, visible canvas texture. Cinematic anamorphic framing, dynamic kinetic camera. Hollywood-level animated cinematography. A two-cut sequence of 5 sec duration.

CUT — fast dynamic shot, rapid whip zoom, fast speed — a single patrolling chopper tears rapidly across the frame against the neon city skyline, rotor blades blurring, searchlight sweeping, the camera snapping to keep up as it cuts hard through the night air. Only one helicopter in frame.

CUT - A high aerial over-the-shoulder shot looking straight down, smooth descending push, normal speed — the camera rides high above and behind a single patrolling chopper as it drops down into the foreground from the top of the frame, its tail and spinning rotor framing the top of the shot, looking down past it at the black muscle car parked far below on the bridge facing forward. The chopper lowers its harsh white searchlight straight down, the beam locking squarely onto the car and pinning it in a bright pool of light against the dark bridge and glowing neon city below. One single helicopter only.

SFX only: the heavy chop and rotor-wash of a single helicopter building from a distant thud into a loud overhead beat, wind, a tense low droning bass underneath, the faint electric hum of the neon city. No dialogue. No music

PROMPT 2:

<<<image_3>>> — Young Black man, short twist-out hair with high fade, white wired earbud in his ear, fine-line neck and hand tattoos, gold rings, cream oversized hoodie, calm focused expression. For Character reference.

<<<image_1>>> — Sleek blacked-out modern muscle car, glossy mirror-black, sharp faceted body panels, thin red LED light bars front and rear, dark multi-spoke wheels with red calipers. Vehicle reference, all angles.

<<<image_2>>> — Neon-noir cyberpunk skyline at night, towering skyscrapers with cyan, magenta and red signage, a glowing red emblem, a wide bridge spanning toward the city. Environment, location and lighting reference.

SPATIAL: <<<image_3>>> sits low inside <<<image_1>>>. <<<image_1>>> is parked on the left edge of a wide bridge in <<<image_2>>>, the neon skyline filling the background. Night, dry road, clear air.

3D cel-shaded painterly animation, Spider-Verse meets Arcane — bold hand-painted brushstrokes, Cinematic anamorphic framing, Hollywood-level animated cinematography. A multi-cut sequence of 13 seconds duration, calm and atmospheric — the stillness before the chase.

CUT — extreme macro close-up, slow smooth dolly-back with a slight arc, normal speed — opens tight on the white wired earbud seated in <<<image_3>>>'s ear, diamond stud subtly glinting beside it, the cable trailing down his neck past a fine-line tattoo. The camera pulls back and arcs around, revealing <<<image_3>>> low in the seat, warm amber light on his face against the cool blue night, head tipped back, eyes half-closed, subtly nodding and vibing to the music, tattooed ringed hand loose on the wheel.

CUT — low diagonal angle, slow creeping push, normal speed — camera positioned low and off to the front corner of <<<image_1>>>, capturing the front and the side together in one diagonal view, the thin red light bars glowing, neon rim-lighting every faceted edge of the glossy black bodywork, the muscular stance reading full and powerful. Slow, deliberate — savoring the car. Coiled, cool, ready.

CUT — wide establishing shot, slow majestic jib up, normal speed — <<<image_1>>> sits parked on the left edge of the wide bridge, small against the vast glowing <<<image_2>>> skyline. The camera cranes slowly upward and back, letting the viewer drink in the neon-noir scenery — towering skyscrapers, the giant red emblem glowing, the bridge sweeping toward the city. Serene, breathtaking, still.

SFX only: distant neon-city hum and electrical buzz, the faint tick of the parked engine, a low ambient bass drone underneath. Calm and atmospheric. No dialogue. No music

PROMPT 3 :

<<<image_1>>> — sleek blacked-out modern muscle car, glossy mirror-black, sharp faceted body panels, thin red LED light bars front and rear, dark multi-spoke wheels with red calipers, quad exhaust. his windshield his blacked out too so no one can see through, for Vehicle reference, all angles.

<<<image_2>>> — a single police patrol helicopter, dark red and black body with a white-and-red side stripe, bubble cockpit with two helmeted officers, a powerful white searchlight beam underneath. One helicopter only. Vehicle reference.

<<<image_3>>> — sprawling neon-noir cyberpunk metropolis at night seen from above and within, towering skyscrapers with cyan, magenta, red and gold signage, glowing avenues threading between the towers, amber-lit streets. Environment, location and lighting reference.

<<<image_4>>> and <<<image_5>>> are For the police car references that are chasing the black muscle car.

SPATIAL: the black muscle car races through the canyon streets of the neon city at night, pursued from behind by police cruisers and tracked from above by the single patrolling chopper with its searchlight. One helicopter throughout. High-speed chase.

3D cel-shaded painterly animation, Spider-Verse meets Arcane — bold hand-painted brushstrokes, confident graphic linework, visible canvas texture. Cinematic anamorphic framing, aggressive kinetic handheld camera, heavy motion blur, speed lines. Hollywood-level animated cinematography. A three-cut high-action sequence of 10 seconds duration

CUT — low chase tracking shot, fast camera racing along the asphalt behind the car, fast speed — locked tight behind the black muscle car as it tears down a neon canyon avenue at full speed, weaving between traffic, glowing skyscrapers streaking past in heavy motion blur, two police cruisers with flashing red-and-blue strobes chasing hard just behind, the single patrolling chopper's white searchlight raking down the street and sweeping across the car. Speed lines, violent energy.

CUT — high aerial god's-eye shot looking down, sweeping fast crane move, fast speed — straight down on the neon city grid, the black muscle car a small dark dart cutting through the glowing avenues far below, the single patrolling chopper's searchlight chasing it as a moving pool of white light, police cruisers trailing in a line behind, the whole metropolis sprawling and alive with light. One helicopter only.

Continued.....

CUT — low front three-quarter hero angle, hard tracking-backward push, fast speed — camera racing backward just ahead of the black muscle car as it powers straight toward the lens through the neon streets, headlights blazing, red LED bars glowing, faceted black body catching cyan and magenta reflections, the driver hunched and focused behind the windshield, chopper searchlight and cruiser strobes flaring in the background. Explosive forward drive — the car owning the chase.

SFX only: the roaring scream of the muscle car engine at full throttle, tires screeching on asphalt, the heavy overhead chop of a single helicopter, wailing police sirens building and fading, wind tearing past, a driving low bass rumble underneath. Pure adrenaline. No dialogue. No music — music added in edit.
