The 3 Things That Turn AI Slop Into Cinema

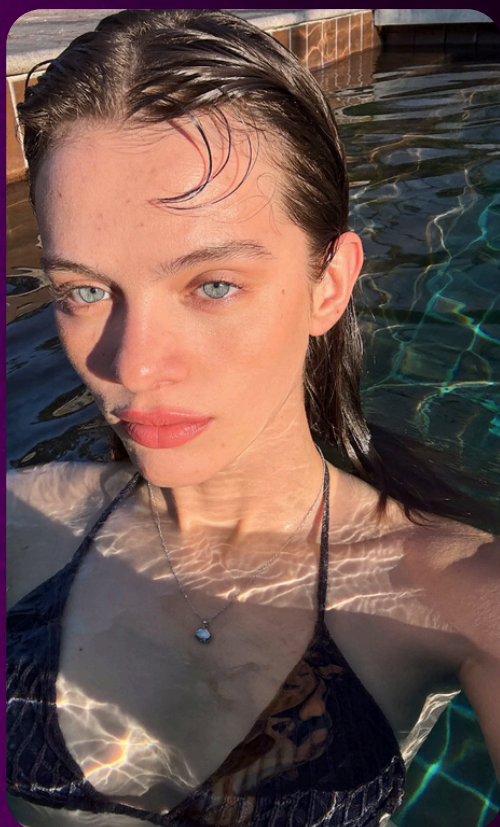

★ THE MODEL LIST — MATCH MODEL TO TASK:

- Your input frame decides everything. Stop using one model for all of it. Here's the exact model list for each task.

IMAGE MODELS

Soul 2.0 (Best Realism)

Your go-to for photorealistic human characters, natural skin, believable lighting. The realism king.

Soul Cinema (Cinematic Frames)

Film-grade cinematic stills – dramatic lighting, filmic color, movie-still composition. When you want it to look shot on camera.

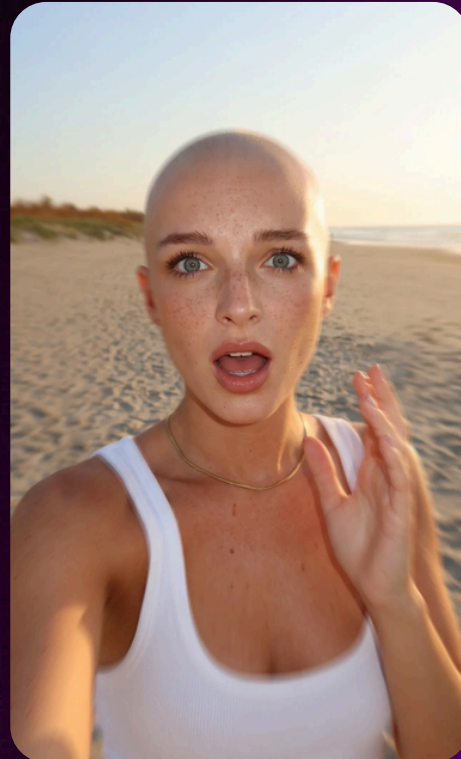

GPT 2.0 (Text-Heavy Images & general editing)

Anything with signage, posters, labels, UI, or lots of readable text. Cleanest typography rendering and also editing images.

Nano Banana Pro/2 (General Editing)

Inserting subjects, fixing flaws, swapping outfits/locations, refining details. Your surgical editor.

Midjourney (Artistic images)

For a vivid aesthetic and variety of styles. Experimentation is the key. Play with parameters to get variations.

Reve(Branding, design & clean images)

For branding, product design, advertisements and posters. It gives your images a clean finish.

Seedream 5.0 (To make poster Images)

Anything with posters, labels, UI, or lots of readable text. Good color combinations and designs.

Recraft V4.1 (Posters & Illustrations)

Refined poster details and artistic designs. You can also use this for branding too.

VIDEO MODELS

Seedance 2.0:

- For crisp 1080p & 2k outputs
- For hollywood level complex shots and VFX
- Higher generation cost (than all models except 2.5)

Kling 3.0:

- For crisp 1080p outputs
- When no complex motion is needed (best for simple outputs)
- Lowest generation cost

Seedance 2.5:

- For best realistic and complex outputs
- State of the art model | Best in class
- Highest generation cost (\$0.34/s)
- Currently only 720p outputs
- For best acting and prompt adherence
- For best video editing/maipulating

Flux 3:

- For best raw retro realism
- Currently closest to seedance in realism
- cheaper (\$0.17/s for standard HD)

MiniMax H3:

- 1/3 of seedance cost (\$0.13/s at 2K, \$0.08/s at 768P)
- But outputs usually looks plastic
- I personally dont use it

Gemini Omni Flash:

- For decent Video editing Only (not for text-to-video or img-to-video)
- Better for talking heads (after seedance)
- Most value for money (very cheap cost - ~\$0.10/s for 720p)

★ THE PROMPT VOCABULARY CHEAT SHEET:

CAMERA :	The Look It Gives
• shot on ARRI Alexa 65 • shot on ARRI Alexa 35 • shot on ARRI Alexa Mini LF • shot on RED Komodo • shot on RED V-Raptor • shot on Sony Venice 2 • shot on Panavision Millennium XL2 • shot on Canon C500 Mark II • shot on Kodak Portra 400 film • shot on Kodak Vision3 500T • shot on 16mm film • shot on 35mm film • shot on 65mm IMAX • shot on Super 8 film • shot on iPhone 15 Pro	Large-format digital - epic, clean, blockbuster scale Gritty, textured realism with rich natural color Compact large-format- modern premium commercial look Sharp, punchy, high-detail digital cinema Ultra-high-res, crisp, dynamic hero-shot quality Clean, filmic, beautiful highlight roll-off Classic Hollywood large-format prestige look Run-and-gun documentary realism, natural color Warm skin tones, gentle grain, nostalgic photo look Cinematic film stock - rich, tungsten-balanced Heavy grain, raw indie/documentary texture Classic cinema grain and organic filmic depth Massive resolution, monumental epic scale Vintage home-movie grain, nostalgic and dreamy Modern natural phone-camera realism, candid feel

CAMERA LENS :	The Look It Gives
• anamorphic lens • vintage spherical prime lens • Cooke S4 prime lens • Zeiss Master Prime lens • Petzval lens • 14mm ultra-wide lens • 24mm wide-angle lens • 35mm lens • 50mm lens • 85mm portrait lens • 135mm telephoto lens • macro lens, extreme close-up • shallow depth of field • deep focus, everything sharp • anamorphic lens flare, bokeh	Wide 2.39:1 scope, oval bokeh, horizontal flares Soft imperfect glass, organic filmic character The "Cooke look" - flattering, warm, painterly skin Clinically sharp, clean, modern precision Swirly vintage bokeh, dreamy vignette edges Dramatic sweeping scale, strong edge distortion Expansive environment, subtle edge distortion Natural, versatile, cinematic everyday framing Human-eye perspective, natural and neutral Compressed background, creamy shallow bokeh Heavy compression, isolated subject, flat depth Tiny detail magnified pores, texture, product Subject sharp, background melted into blur Whole frame crisp front-to-back, Kubrick-style Streaks and glints when light hits the glass

DIRECTOR'S STYLE :	The Look It Gives
• in the style of Denis Villeneuve • shot by Roger Deakins • in the style of David Fincher • in the style of Wes Anderson • in the style of Christopher Nolan • in the style of Terrence Malick • in the style of Wong Kar-wai • in the style of Stanley Kubrick • in the style of Quentin Tarantino • in the style of Greta Gerwig • in the style of Alfonso Cuarón • shot by Emmanuel Lubezki • in the style of Zack Snyder • in the style of Sofia Coppola • in the style of Gaspar Noé	Vast, minimal, awe-inducing sci-fi grandeur Master cinematography – perfect natural light Cold, precise, dark, meticulously controlled Symmetrical, pastel, whimsical, flat framing Grand, IMAX-scale, tense, practical realism Dreamy golden-hour, natural light, poetic Saturated neon, moody, romantic, dreamy blur Symmetrical one-point perspective, cold precision Bold, stylized, punchy, retro-cool framing Warm, tactile, character-driven, soft naturalism Long immersive takes, floating naturalistic camera Sweeping natural-light wide-angle, immersive flow High-contrast, desaturated, epic slow-motion power Soft, dreamy, pastel, quietly melancholic Neon-drenched, hypnotic, bold saturated color

★ PROMPT EXAMPLES:

PROMPT 1:

Shot on ARRI Alexa 65, Panavision Sphero 65 40mm lens, in the style of Denis Villeneuve, Blade Runner 2049 vibe. A lone figure in a long charcoal coat walks through a vast orange dust storm, dwarfed by the colossal weathered statue of a seated woman half-buried in sand beside them, the horizon dissolving into glowing amber haze. Monumental scale, tiny human in enormous negative space, diffused sunless glow, silhouetted forms, dust suspended in the air. Saturated burnt-orange and ochre palette, deep shadow, silent and monumental.

**PROMPT 2:**

Shot on RED V-Raptor, 35mm lens, in the style of Quentin Tarantino, The Godfather warm amber grade. A woman seated near a fountain alone, in Italy in her wedding dress with a bouquet in her hand, wearing her veil, romantic yet sad, sunny, blue sky, local people in the background, rich palette, pleasant.

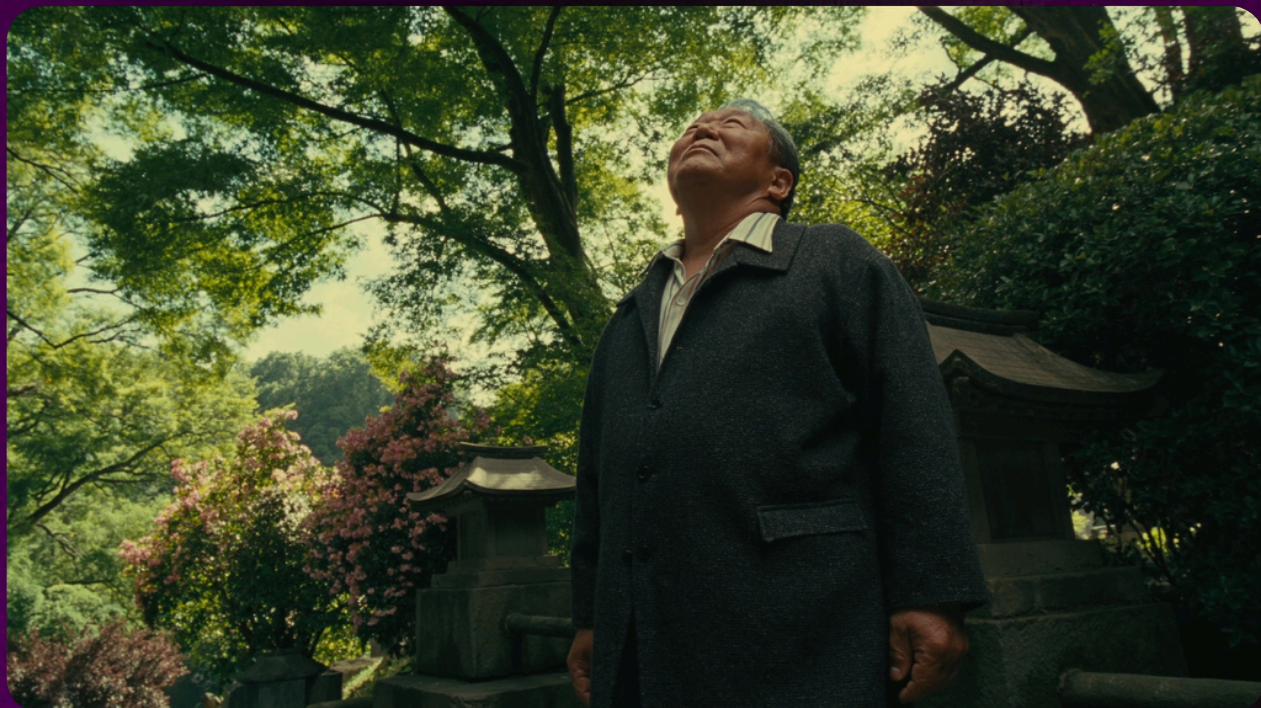

★ PROMPT EXAMPLES:

PROMPT 3:

shot on Kodak Vision3 500T, 24mm wide-angle lens, in the style of Alfonso Cuarón, 1917 continuous war-film grade vibe. A woman wearing a polka dot frock, seating in an expensive luxury car bruenette brown hair, is looking away from the camera. She is driving on a busy new york street, her hair flying with the winds. Vivid color palette, the mood is melancholic, fashion movie style camera framing, an evening sky and buildings in the background, halation.

**PROMPT 4:**

Shot on Sony Venice 2, vintage spherical prime lens, in the style of Christopher nolan, Snakes on the plane vibe. An old japanese man in a beautiful forest looking up at the sky, sunny canopies with some floral trees, stone architectures around trees. Saturated color rich palette, pleasant and happy.

★ **PROMPT EXAMPLES:****PROMPT 5 :**

Shot on RED Monstro 8K, Zeiss Master Prime 32mm, in the style of David Fincher, Zodiac vibe. A man in a rumpled shirt sits alone in a fluorescent-lit 1970s newsroom at 2am, surrounded by paper stacks, mid-thought with a pen against his lip. Locked-off symmetrical frame, cold green-tinted overheads, sickly institutional palette, fine skin texture and tired under-eye shadow, clinical stillness, dread underneath.

**THE SMART STRATEGY:**

It was never about the newest video model. Cinema-grade AI comes from a strong input frame, prompting like a real cinematographer, and finishing with organic film texture. Get these three right and even an old Kling model outputs footage people swear was shot on IMAX. The tool is never the bottleneck — the process is.
