

The 3 Skills Behind Hollywood-Grade AI

1 Build Your Prompt Vocabulary :

- Learn the terms AND when to use each one. These are the five dials every real cinematographer controls:

CAMERA MOVEMENT CHEATSHEET

15 essential moves — build your prompt vocabulary

1 Static Camera stays perfectly still.	2 Pan Pivots left-right on a fixed spot.	3 Whip Pan A super-fast pan that blurs the frame.
4 Tilt Pivots up-down on a fixed spot.	5 Push In Camera physically moves closer.	6 Pull Out Camera physically moves back.
7 Zoom Lens tightens in — camera stays put.	8 Crash Zoom A sudden, aggressive snap zoom.	9 Dolly Zoom Zoom + dolly opposite — warps space.
10 Camera Roll Frame rotates around its center.	11 Tracking Camera follows the subject along.	12 Trucking Camera slides sideways, parallel.
13 Arc Camera circles around the subject.	14 Boom Camera rises or lowers on a crane.	15 Camera Shake Erratic handheld jitter for chaos.

Basic camera shots

Distance-based shots

Angle-based shots

Extreme Wide Shot

- To establish a sense of place and times
- Often used as an establishing shot at the beginning of a film or scene.

Eye-level Shot

- To create a direct connection with the viewer
- To foster a sense of neutrality or equality

Wide Shot

- To establish a location or setting
- Showcase the relationship between a subject and their environment

High Angle Shot

- To make a subject seem smaller, vulnerable, or powerless

Full Shot

- To introduce characters and settings
- To emphasize body language and movement

Low Angle Shot

- To make a subject look powerful, dominant, or heroic

Medium Shot

- To capture dialogue or show a comfortable conversational distance
- Ideal for conversations involving more than one person

Bird's-eye View

- To establishing overview of a scene
- Show relationships between subjects or emphasize scale

Zoom-in for better understanding

Close-up Shot

- To emphasize emotion
- To show or highlight detail

Worm's-eye View

- To make a subject appear larger than life & convey power or dominance
- Create a sense of vulnerability in the viewer

Extreme Close-up Shot

- To emphasize emotion or highlight small details
- To build tension or create intimacy

Dutch Angle

- To convey feelings of unease, disorientation, tension, or chaos

Over-the-shoulder shot

- To establish pov between two characters and audience
- Primarily in dialogue to create intimacy, connection or confrontation.

Point of View (POV) Shot

- To show what a character sees
- To create a sense of reality, immersion, or a specific emotional experience

Zoom-in for better understanding

TYPES OF LIGHTING CHEATSHEET

1. HIGH KEY LIGHTING

- Background + subjects are evenly lit
- Low contrast
- Used for happier scenes

2. LOW KEY LIGHTING

- Background + subjects are not evenly lit
- High contrast
- Used for darker, dramatic scenes

3. CHIAROSCURO

- Low-key lighting with a high contrasting ratio
- Used to highlight mysterious & dangerous qualities

4. HARD LIGHT

- It is a directional light creates shadows
- Used for intense and dramatic scenes

5. SOFT LIGHT

- It is a diffused light, less shadows
- Used for romantic & happier scenes

6. VOLUMETRIC LIGHTING

- Used to create "God rays"
- Usually travel through dust, fog, haze & rain
- Use for memorable shots

7. BOKEH

- This light is the out-of-focus light
- Used to isolate subject, to show dreamy like effect & curiosity

8. SILHOUETTE

- Subject is against a brighter background
- Used to showcase mystery, concealing identity of character, etc

2 Learning Manual Prompting :

THE SKILL THAT CHANGES EVERYTHING — READ A PROMPT LIKE A MAP:

- Here's what separates amateurs from artists: when Claude hands you a prompt, **you should be able to point at ANY part of it and say exactly what it controls.**
- The moment you can read a prompt like that, **you can tweak any single piece to bend the image** toward the exact masterpiece in your head.
- A prompt isn't a magic spell. It's a set of dials. Learn the dials, and **you can manipulate any image into anything you want.**

ANATOMY OF A PROMPT

Know what every part does — then you control the image, not the other way around

THE PROMPT CLAUDE GAVE YOU:

Low-angle medium shot¹ of a lone detective in a rain-soaked trench coat lighting a cigarette², inside a neon-lit alley at night³, hard rim light from a flickering sign⁴, shot on ARRI Alexa 65 with an anamorphic lens⁵, in the style of David Fincher⁶, teal and orange grade⁷, heavy film grain and halation⁸, tense and lonely mood⁹.

1 FRAMING + ANGLE

CONTROLS

How much you show + the power dynamic

→ TWEAK IT

high-angle close-up = small & vulnerable

2 SUBJECT / ACTION

CONTROLS

Who is in frame and what they do

→ TWEAK IT

swap wardrobe or action to change the story

3 LOCATION + TIME

CONTROLS

The world and the time of day

→ TWEAK IT

foggy harbor at dawn = new mood

4 LIGHTING

CONTROLS

The single biggest mood driver

→ TWEAK IT

soft golden light = warm & hopeful

5 CAMERA + LENS

CONTROLS

The physical texture of the image

→ TWEAK IT

16mm film = raw & gritty

6 DIRECTOR

CONTROLS

Framing, pacing & visual signature

→ TWEAK IT

Wong Kar-wai = lush & romantic

7 COLOR GRADE

CONTROLS

The emotional temperature

→ TWEAK IT

bleach bypass = bleak & tense

8 TEXTURE

CONTROLS

Hides the AI-ness, adds realism

→ TWEAK IT

dial down = clean digital look

9 MOOD

CONTROLS

The feeling, in 2-3 words

→ TWEAK IT

hopeful & warm = flips the tone
