The Seedance Prompt Structure

★ THE 5 BLOCKS — IN ORDER:

THE SEEDANCE PROMPT STRUCTURE

5 blocks — in order, every generation

1 BLOCK 1: ASSET & PROP BINDING

- Tell the model exactly what every upload is.
- Describe your assets after they are @tagged.

✓ EXAMPLE — BLOCK 1:

[1 — ASSET BINDING]

<<<image_1>>> — LOCATION REFERENCE. A vast desert basin: deep orange-red sand and gravel floor, dark eroded rock ridges and mesa walls, hazy violet mountain ranges on the far horizon, hard cloudless blue sky, heat haze and fine dust in the air. Sounds like open wind, blowing grit, and tyres tearing across loose gravel. Use this for the terrain, colour, atmosphere and light of the entire video.

<<<image_2>>> — CHARACTER REFERENCE, THE WOMAN. Front close-up, full front and full back views of the same person. Very pale skin, large solid black eyes with no visible iris or white, heavy black lash line and smoky shadow, full glossy nude-pink lips. Extremely long straight platinum blonde hair, centre-parted, falling past her waist. She wears a dark iridescent metallic green bodysuit with a high turtleneck collar, long sleeves, a keyhole cutout at the chest and full-length legs; a black leather strap crosses her torso diagonally with a gold buckle plate; a gold chain-and-crystal belt crosses at her hips. Black nail polish. Hot pink boots with tall upward-flaring spiked shafts. She moves with predatory focus and rides aggressively. Use this for her face, hair, wardrobe and build.

<<<image_3>>> — CHARACTER REFERENCE, THE MAN. Front close-up, full front and full back views of the same person. Pale skin, closely shaved blond head, blond stubble beard, heavy black smudged makeup hollowing both eye sockets around pale grey-green eyes. He wears a dark metal circlet of two studded bands with a silver flower medallion at the centre of his forehead and a small pendant hanging between his brows, a silver stud earring, and a spiked chain necklace with a large pale round stone at the throat. Black leather cropped vest covered in dome studs, open at the chest. Black leather trousers, pointed silver shoes. He rides loose and unbothered, arrogant. Use this for his face, wardrobe and build.

<<<image_4>>> — PROP REFERENCE, THE WOMAN'S MOTORCYCLE. Two views of the same bike. A compact scrambler with weathered olive-green bodywork, a moulded skull face forming the front cowl, hot pink wheel rims, pink fork lowers, pink brake caliper, spoked wheels and knobby off-road tyres. Sounds like a high-pitched electric turbine whine that rises and falls with throttle. This is the bike the woman rides.

<<<image_5>>> — PROP REFERENCE, THE WOMAN'S WEAPON. Three views of the same object. An ornate golden axe-pistol: brushed gold body, a curved crescent axe head with a long upward spike, a pistol grip and trigger, and a slender curved gold barrel running downward with a pale pink inlay stripe, set with a silver filigree panel holding faceted red and blue gemstones. Sounds like a rising electrical charge whine followed by a sharp cracking discharge. She carries it clipped to the black strap across her torso and fires bright green laser bolts from it.

<<<image_6>>> — PROP REFERENCE, THE MAN'S MOTORCYCLE. Two views of the same bike. A long low custom bike in bare polished raw steel — unpainted tank, exposed frame, long flat tail, black seat, air-cooled V-twin engine, belt drive. A large polished chrome human skull is mounted on the front forks as the headlight nacelle, with glowing amber eye sockets. Solid chrome disc front wheel ringed with metal spikes. Sounds like a deep guttural V-twin roar with hard exhaust pops on deceleration. This is the bike the man rides.

2 BLOCK 2 : THE SUMMARY

- Two or three lines describing the entire scene in plain language.
- Keep it tight: who, where, what happens, and the feeling.

✓ EXAMPLE — BLOCK 2:

[2 — SUMMARY]

The woman from <<<image_2>>> rides the green bike from <<<image_4>>> and carries the weapon from <<<image_5>>>. The man from <<<image_3>>> rides the chrome bike from <<<image_6>>>. These pairings must never swap.

A pale black-eyed woman in a metallic green bodysuit hunts a studded leather-clad man across an open red desert, her green skull-nosed scrambler chasing his chrome skull-nosed cafe racer at full speed. She draws a golden axe-pistol and fires a green laser bolt at him just as he launches off the lip of a ravine — and misses. He lands clean on the far side, drifts to a stop, and turns back to smirk at her across the gap while she sits stranded at the near edge, gritting her teeth.

3 BLOCK 3 : THE STYLE

- This is what keeps the whole generation visually consistent.
- This defines the LOOK and locks it across every shot: the camera and lens, the lighting, the theme, and the color grade.

✓ EXAMPLE — BLOCK 3:

[3 — STYLE]

Live-action cinematic sci-fi action film. Shot on 35mm anamorphic — wide lenses for the chase and jump, long lens with shallow depth of field for the close-ups and the final standoff. Harsh high desert sun with hard-edged shadows and blown warm highlights, deep saturated ochre sand against a hard blue sky, crushed shadows in the rock, heat haze shimmering off the ground. Organic film grain, high dynamic range, subtle horizontal anamorphic lens flare. Kinetic, weighty, practical — the feel of real vehicles moving at real speed. Photographic realism throughout.

4 BLOCK 4 : THE PLOT

EVERY BEAT ANSWERS 4 QUESTIONS:

- Shot size + angle – Wide, medium, close-up? Low, high, eye-level?
- Camera motion – Static, push in, pan, orbit, tracking?
- The action – Exactly what the subject does in this beat.
- The transition – How you move into the next beat – cut, whip pan, match cut?

✓ EXAMPLE — BLOCK 4:

[4 — DETAILED PLOT]

0–3s: Establishing. High aerial perspective sweeping down across the open desert basin, mesa walls and hazy mountains filling the horizon. Two bikes tear across the floor far below, throwing long twin rooster tails of red dust — the chrome bike from <<<image_6>>> leading, the green bike from <<<image_4>>> running hard behind it. The camera dives and levels out into a fast low tracking shot alongside them, closing the gap on the green bike.

3–5s: Hard cut. Tight close-up on the woman from <<<image_2>>>, camera travelling backward in front of her at her own speed. Her long blonde hair streams straight back in the wind, her solid black eyes locked forward. Her jaw sets. She twists the throttle and the whine climbs.

5–7s: Hard cut. Medium shot of the man from <<<image_3>>> riding, camera tracking laterally alongside the chrome bike, the skull nacelle catching the sun. He turns his head and throws one quick look back over his shoulder at her — unhurried, dismissive — then faces forward and opens the throttle.

7–9s: Hard cut. Back on the woman, medium-close from a low front three-quarter angle. She reaches across her body with her right hand, unclips the golden axe-pistol from <<<image_5>>> off the strap on her chest and swings it up, holding the bars one-handed as she levels the weapon forward and sights along it. The gemstones flash in the sun. A rising charge whine builds.

9–12s: Hard cut. Very wide side-profile shot from across the ravine, long lens. The ground ahead of the man breaks away into a deep gorge with a wide gap between two rock lips. He hits the edge at speed and the chrome bike launches out over the void in a flat arc. Behind him the woman fires — a hard bright green laser bolt lances across the frame, streaks past just behind his rear wheel and blows a burst of rock and dust off the far cliff face. He is already past it.

12–15s: Hard cut. Extreme low angle, camera almost at ground level on the far side looking up. The chrome front wheel drops into frame and slams into the dirt, spikes biting, the forks compressing hard, a violent burst of dust and stone punching outward. The rear wheel comes down and the bike squats under the load. The camera shakes with the impact.

15–18s: Hard cut. Wide low shot on the far side. He stamps the rear brake and lays the bike into a long semi-circle drift, the rear wheel sweeping a curved wall of dust behind him until he comes to a stop side-on, facing back across the ravine. He plants a foot, turns his head toward the gap and smirks. Rack focus: the focus shifts smoothly off him so he softens into blur, while the woman — small and out of focus in the far background, stopped at the opposite lip — comes gradually sharp.

18–20s: Hard cut. Tight close-up on the woman, stopped astride the green bike at the near edge of the ravine, the drop falling away behind her. Long lens, shallow focus. Her platinum hair whips hard across her face in the wind, the golden weapon still raised and useless in her hand. Her lips pull back and she grits her teeth, jaw clenching, black eyes fixed across the gap. Final frame holds on her.

5 BLOCK 5 : OVERALL REQUIREMENTS

- Anything the model must hold constant across the entire generation. Audio rules (no music, SFX only), most importantly — anything that came out wrong last time.

✓ EXAMPLE — BLOCK 5:

[5 — OVERALL REQUIREMENTS]

Hold across the entire video: 16:9 widescreen frame. One woman and one man only — no other riders, vehicles or people anywhere in the desert. Each character keeps the exact face, hair, makeup and wardrobe from their reference sheet in every shot, and each stays on their own bike for the full duration. Consistent grade, grain, lens character and time of day across all eight shots. Constant kinetic camera movement — every shot carries a distinct move. Real physical weight in the vehicles: suspension compresses, tyres deform, dust behaves as heavy particulate. Stable geometry on both bikes and the weapon, no warping of wheels, frames or limbs. The laser bolt is a bright saturated green and clearly misses.

Audio: sound effects and diegetic sound only. Engine noise, wind, tyres on gravel, the charge whine and crack of the weapon, the impact of the landing, the drift, and the low idle of both bikes at the standoff. No BGM, no score, no music of any kind. No subtitles.

Strictly avoid: animation, illustration, painterly texture, 3D CG render look, video game aesthetic, glossy plastic surfaces, additional characters or vehicles, the two bikes swapping riders, text, lettering, logos or watermarks anywhere in frame, letterboxing or black bars, slow motion.

THE SMART STRATEGY:

A thousand prompts in your notes app won't make you better — understanding the structure will. Once you internalize these 5 blocks, you're not copy-pasting anymore. You're architecting a shot the model can actually build. That's the difference between hoping for a good output and engineering exactly what you pictured.
